

Reflection foil 600 x 1200 mm (orange)

Item No.: 500114

Reflection foil for self fitting for DLS/FLS.

The reflective foil provides a defined measuring target, to improve signal conditions reflected to the measuring device DLS/FLS. It must be used for distances longer than 65 meters. These target plates work over distances from about 25 to 150m.

Size: 600 x 1200 mm
